Dear Ms. Henney:

I am very worried and concerned about the antibiotics being put in the animal feed. I am so concerned that I no longer eat meat.

What can you do to get this stopped? The general public is so over medicated with antibiotics.

The animals are given antibiotics to make them grow faster so the meat industry can collect more money quicker, but I think it is very dangerous and harmful to the body. We do not need this. It needs to be stopped now and it never should have been started.

I would appreciate your opinion and answer to this letter.

Sincerely,

Linda C. Connelly
